TOSHIBA Bipolar Linear Integrated Circuit Silicon Monolithic

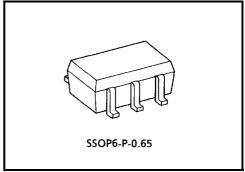

TA4017FT

VHF Wide Band Amplifier Applications

Features

High gain: |S21|2 = 13dB (@45 MHz)
Low distortion: IM3 = 42dB (@45 MHz)

• Operating supply voltage: $V_{CC} = 4.75 \text{ V} \sim 5.25 \text{ V}$

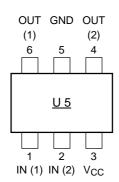

Weight: 0.0045g (typ.)

Maximum Ratings (Ta = 25°C)

Characteristics	Symbol	Rating	Unit	
Supply voltage	V _{CC}	5.5	V	
Total power dissipation	P _D (Note 1)	300	mW	
Operating temperature	T _{opr}	-40 to 85	°C	
Storage temperature	T _{stg}	-55 to 150	°C	

Note 1: When mounted on the glass epoxy of 2.5 $\text{cm}^2\times 1.6\ t$

Pin Assignment

Electrical Characteristics (Ta = 25°C, V_{CC} = 5 V, Zg = ZI = 50 Ω)

Characteristics	Symbol	Test Circuit	Test Condition	Min	Тур.	Max	Unit
Circuit current	Icc		Non Carrier	15	19	25	mA
Band width	BW	Fig1	(Note 2)	0.7	1	_	GHz
Input return loss	S11 ²		f = 45 MHz	_	-0.8	_	dB
Insertion gain	S21 ²		f = 45 MHz	10	13	16	dB
			f = 400 MHz	_	12.5	_	
Isolation	S12 ²		f = 45 MHz	_	-40	_	dB
Output return loss	S22 ²		f = 45 MHz	_	-3.5	_	dB
Noise figure	NF		f = 45 MHz	_	3	4.5	- dB
			f = 400 MHz	_	3	_	
Output power at 1dB gain compression	Po1dB		f = 45 MHz	0	2	_	dBmW
			f = 400 MHz	_	2	_	
3 rd order inter modulation	IM3		f1 = 45 MHz, f2 = 44 MHz, Pin = -20dBmW	34	42	_	- dB
			f1 = 400 MHz, f2 = 399 MHz, Pin = -20dBmW	_	42	_	

Note 2: BW is the frequency of 3dB down from $|S21|^2$ at 45 MHz. CAUTION: This device electrostatic sensitivity. Please handle with caution.

Notice

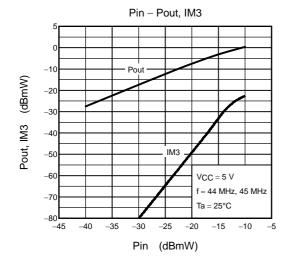

The circuits and measurements contained in this document are given only in the context of as examples of applications for these products.

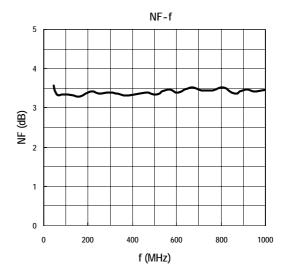

Moreover, these example application circuits are not intended for mass production, since the high-frequency characteristics (the AC characteristics) of these devices will be affected by the external components which the customer uses, by the design of the circuit and by various other conditions.

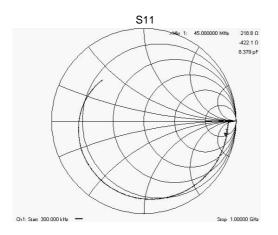

It is the responsibility of the customer to design external circuits which correctly implement the intended application, and to check the characteristics of the design.

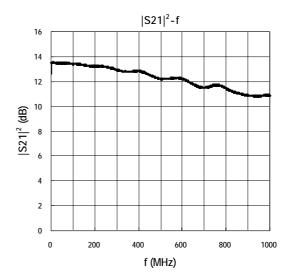

TOSHIBA assume no responsibility for the integrity of customer circuit designs or applications.

RESTRICTIONS ON PRODUCT USE

030619EBA

- The information contained herein is subject to change without notice.
- The information contained herein is presented only as a guide for the applications of our products. No
 responsibility is assumed by TOSHIBA for any infringements of patents or other rights of the third parties which
 may result from its use. No license is granted by implication or otherwise under any patent or patent rights of
 TOSHIBA or others.
- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property.
 In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- The products described in this document are subject to the foreign exchange and foreign trade laws.
- TOSHIBA products should not be embedded to the downstream products which are prohibited to be produced and sold, under any law and regulations.
